### DETAILED ACTION

This action is in response to applicant's amendment received on 9/05/02.

#### *Election/Restrictions*

1. Claims 2-4 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 6.

#### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hoehn in view of G. W. Urschel et al. (3, 521, 688).

Hoehn discloses (Fig. 1-10) the invention substantially as claimed including a circular rear base plate 74, a first plurality of food conveying paddles 28a-e, the end of each paddle located adjacent the rear base plate being located at least in partially trailing relationship. Hoehn doesn't show one forward located annular ring. However, Urschel teaches the use of one forward located annular ring 40 for the purpose of increasing the structural integrity. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Urschel's paddles by

providing one forward located annular ring as taught by Urschel in order obtain increase the structural integrity.
